

# *FASTER*

At North Memorial's new Emergency Room, we're finding ways to help our patients as quickly as possible, and it's working. The time it takes for a patient to be seen and discharged is consistently **faster** than national averages.

We've achieved this through innovations like **faster** lab result turnaround times. We also feature improved patient-flow processes and multi-purpose exam rooms suitable for patients with everything from coughs to cuts and sprains.

***Whatever your emergency, North Memorial is here for you.***

When an unexpected health problem arises, it's good to know the best emergency care is just minutes away. And North Memorial's new Emergency Room might be **closer** than you think. In fact, North Memorial was chosen by Twin Cities residents as the metro's most conveniently located hospital\*.

We're located just off County Road 81 in Robbinsdale, only minutes from several major highways, allowing for easy access from any direction. Ample on-site parking is available, with free valet service available at the emergency entrance. Print driving directions at [northmemorial.com](http://northmemorial.com) or call (763) 520-6305.

# NICER

North Memorial is consistently chosen as the Twin Cities' most preferred hospital for emergency care\*. We have achieved this distinction by listening closely to our patients and staff. In fact, many of their ideas inspired the design of North Memorial's new Emergency Room.

Enhancements include a softer, more healing environment. Our lobby features natural lighting and a new children's play area. We offer private patient rooms with adjacent meeting areas for families. Most importantly the new design helps us make patients comfortable and begin treatment as quickly as possible.

\*NRC Healthcare Market Guide

North Memorial is consistently identified by Twin Cities residents as their most **preferred** hospital for emergency care.\* We're proud of our long tradition of caring for critically ill and injured patients and their families.

And while you might first think of us as a regional Level I Trauma Center (we will treat nearly 80,000 patients this year), we are also a community hospital. Our new Emergency Room can serve any emergency care need – everything from heart attacks to cuts and coughs.
